Presidents Corner

Chapter Members,

Thank you to everyone who was able to attend our second chapter meeting of the year; we had a big turnout and packed the house! We hope that this trend continues and we are excited to see everyone at our next meeting!

The 24th Annual ASHRAE Golf Tournament this past month was a great success! We had a total of 16 teams and were able to raise close to \$4,000 for our chapter! The Board of Governors would especially like to thank all of our sponsors, players and volunteers, as well as Brian Schaffler for organizing yet another wonderful tournament for our chapter.

We have a few events coming up that we would like to make sure everyone is aware of:

- Our next regularly scheduled meeting will be held at the University of Memphis Holiday Inn on November 11, 2014 at 11:30 am.
- Partnering with ASPE, we will be hosting an "Update Your Compressed Air Design Skills" Seminar on November 13, 2014 at 1:00 p.m. at the University of Memphis Holiday Inn – Overton Room. This event offers (4) PDH Credits for only \$75! For more information or to register, please contact Danny McKee at dannym@a2h.com
- In lieu of our December meeting, we will be having our annual Christmas Party on the evening of Tuesday, December 9, 2014. More information to follow!

As you can see, the BOG has been working hard to make this year better than ever! We appreciate the continued support and hope to see everyone at our upcoming events!

Sincerely,
Aubrey Tucker

This month's presentation:

New Approaches to Slash Lab and Commercial Building Energy Use and Improve IEQ

In the face of significant energy costs and concerns over global warming, buildings are receiving increasing scrutiny to reduce their carbon footprint and cut their energy expenses. For many buildings outside air is the largest single driver of both energy efficiency and indoor environmental quality. Demand control ventilation has attempted to reduce energy expenses by controlling outside air but the actual results over time have been mixed at best. This talk will discuss and provide case studies of both commercial and laboratory buildings for a more energy efficient and healthier variation on demand control ventilation that uses a new, cost effective, and more accurate sensing approach known as multiplexed sensing.

Presenter: Peter Hmelyar

Peter Hmelyar is the Regional Vice President, Central Region for Aircuity Inc. and joined the company in November 2000. He is responsible for all the sales activities for the Aircuity OptiNet System for the Central Region of the US (19 states) and Canada (two Provinces). Aircuity is headquartered in Newton, MA and Peter is based in Wheaton, IL.

Peter has over 30 years of sales management experience in the building and laboratory controls businesses. Mr. Hmelyar spent 10 years at Phoenix Controls in various positions of sales management including their VP of Global Sales with responsibility for all of their sales activities. During this time and before at Solidyne and Margaux Systems where he held VP of Sales, and VP of Sales and Marketing positions respectively, Mr. Hmelyar achieved great success working through independent distribution channels to provide building and laboratory controls solutions to their customers. He holds a BSME from the University of Akron.

Calling all Members

Chapter Members,

The Memphis CRC is right around the corner and we need your help! We need any and all volunteers to assist the CRC chairman with the daunting task of entertaining guests from the seven states in our region. Anything is useful! If you have the hours to volunteer please do, also if you have any connections that might be useful please help us out! We thank you in advance for anything you have to offer.

New Member Roundup

Please extend a warm welcome to these new members:

Steven Braun
Jeremy James
Todd Jones
Corey Miller

Returning Member Roundup

Please extend a warm welcome to these returning members:

Roddy Lee
Aaron Whitten
Gary Whittam

Transferring Member Roundup

Please extend a warm welcome to these transferring members:
Dean Oakley (Region X - Hawaii)
