University of Memphis - Holiday Inn

Presidents Corner

Chapter Members,

Thank you to everyone who was able to attend our first chapter meeting of the year! We received a lot of good feedback from those who were able to make it and we hope that everyone benefited from the panel discussion.

The 24th Annual ASHRAE Golf Tournament is coming up on Monday October 6, 2014 at Chickasaw Country Club! If you have not already, be sure to sign up to play or be a sponsor! For more information on the tournament, go to our Memphis ASHRAE website at <http://www.ashraememphis.org/> . I want to remind everyone that this is our big fundraiser for the year that benefits our ASHRAE Chapter as well as ASHRAE Research Promotion! That being said, any money towards the tournament is completely tax deductible!

We look forward to seeing everyone come support the ASHRAE Memphis Chapter at our Golf Tournament, and our meetings will continue on Tuesday October 14, 2014 at 11:30 at the University of Memphis Holiday Inn!

Sincerely,
Aubrey Tucker

This month's presentation:

Air Management & System Pressurization in Hydronic Systems

By: James "Jamie" Edmondson

Jamie Edmondson is President of James M Pleasants Co. He has been with the company for 19 years. Through his work with consulting engineers, he has been involved with the design of many types of systems including variable-primary, condensing boilers, and thermal storage. His interests include hydronic systems, steam, and sustainable design. He has developed hydronic seminars on various topics and is an instructor for the North Carolina State University Industrial Extension Service. He has also presented at ASHRAE and Association of Energy Engineers chapter meetings. He is an approved continuing education instructor for the North Carolina State Board of Examiners for Plumbing, Heating and Fire Sprinkler Contractors and the North Carolina Board of Examiners for Engineers and Surveyors. He received bachelor degrees in electrical and computer engineering from North Carolina State University, and a master's degree in computer science from the University of California, Los Angeles. During 2000 to 2014, he has presented seminars to various engineers on the following subjects:

Basic Primary/Secondary Variable Volume Pumping
Chiller Plant Piping
Air Control Systems
Cooling Tower Piping
Variable Speed Pumping
Hydronic Balance

His principal areas of interest are energy savings, primary/secondary variable volume systems, heat transfer, hydronic systems, plumbing piping systems and central chilled water plant design.
