## Calling all Members

Chapter Members,

The Memphis CRC is right around the corner and we need your help! We need any and all volunteers to assist the CRC chairman with the daunting task of entertaining guests from the seven states in our region. Anything is useful! If you have the hours to volunteer please do, also if you have any connections that might be useful please help us out! We thank you in advance for anything you have to offer.

## New Tomorrows for Today's Buildings

ASHRAE's Chapter Technology Transfer Committee will present a **FREE Webcast** on Thursday, April 23, 2015. This webcast will feature industry experts who will define the benefits of existing building commissioning for the environment, occupants, operations staff, and overall ownership costs. Viewers will be able to recognize the varied scopes of commissioning, when to apply comprehensive versus focused commissioning, and best practices in existing building commissioning specifications & contracting.

## Presidents Corner

Chapter Members,

Welcome back to a new year with the ASHRAE Memphis Chapter! I hope everyone had a wonderful holiday and is excited about 2015! We have some great speakers lined up for the remainder of the year and hope you will attend!

I would like to thank everyone who was able to attend this year's Christmas party at Stonebridge Golf Course. I think everyone who attended had a good time and it was great to be able to get together around the holidays!

We have some exciting meetings and events coming up this spring, but the first two are our regularly scheduled meeting on January 13, 2015 and the Annual ASHRAE Winter Conference and Expo in Chicago January 24-28th.

If you are attending the Expo in Chicago, please email me at [aubreyt@aircompinc.com](mailto:aubreyt@aircompinc.com) and let me know. We receive PAOE points for every person in our chapter who attends the conference!

Thanks again, and we look forward to seeing you on January 13th!

Sincerely,  
Aubrey Tucker

This month's presentation:

## **Indoor Air Quality - UV for New Construction & Retrofit Projects**

Presentation will specifically cover the topic of Indoor Air Quality and how injecting UV in the HVAC system & in the upper air of a room can help reduce illness, reduce absenteeism, and improve performance. I will review the benefits of implementing UV during construction and also benefits of retrofitting existing systems. I will also touch on some of the specific applications – Schools, Hospitals, and Government buildings.

### **Presenter: Andrew Magdovitz**

Born and raised in Memphis, TN, Andrew Magdovitz graduated from CBHS and completed his undergraduate studies at the Indiana University Kelley School of Business. He is a Certified Green Globes Professional and has a background in Real Estate & Construction and Business Development. Andrew began working in the Energy Efficiency & Sustainability industry in 2009 originally focusing on Power Quality, lighting and HVAC. His industry focus is the 'building big 4' – Electrical, HVAC, Building Envelope & Environmental Sustainability – comprising majority of his duties are a focused on Indoor Air Quality & Energy Efficiency. Andrew serves as the sales manager for Evergreen-Lumalier UV, a Memphis based UV manufacturing company.
