Presidents Corner

Chapter Members,

As the final presentation approaches for the '15-'16 season, I would like to thank the officers, board members, committee members and volunteers that have served over the past year. It has truly been an honor to have been president and I hope that all of our members have enjoyed the programming and activities that we have provided over the past season.

The ASHRAE 2016 Annual Conference is being held in St. Louis from June 25th thru 29th.

SAVE THE DATE for the 2016 Region VII CRC in Birmingham – Thursday August 4th thru Saturday August 6th.

We look forward to seeing everyone at the chapter meeting (11:30AM 5/10/16) in the Holiday Inn at the U of M.

Sincerely,
Tom Bird

Presenter: Kyle DelPiano
Modern Pump Selection

Selecting a centrifugal pump based on optimizing system pumping efficiency is critical for the lowest life cycle pumping costs. Pumping systems can have significant load (flow) variations based on their load profile. In this presentation we will look at how a pump that operates at a higher efficiency during part load can significantly decrease pump operating cost. Below is an outline that will be covered:

Modern Pump Selection for System Efficiency
Basic Pump Affinity Laws
Pump Head Loss Calculations
Pump Curve Review
System Curve Review
Pump Selection Examples
